

Mirbeau

HEALTH & SANITATION PROGRAM

We are closely monitoring government policy changes, Centers for Disease Control (CDC) guidelines, government mandates, and public health advancements and will continue to make changes as necessary or appropriate to our protocols and procedures.

Spa Mirbeau HEALTH & SANITATION GUIDELINES

Statement from Michael DalPos, Chief Executive Officer, Mirbeau Hospitality Services

At Mirbeau we care deeply about our family of employees, guests, and our communities. When we decided to close our doors, we did it with a heavy heart, but we knew it was in the best interest of our Family. We also understood that asking 700+ employees to stay home during the pandemic without any income would present them with a terrible challenge. When we closed, we chose to take on the financial burden of making sure that our payroll (including an amount to account for tips) continued for all our full and part time employees. We knew this would be very difficult, but we felt deeply that as a Family, it was our responsibility to handle it. Many in our industry did not believe they could do the same.

So far, we have made it, and our Family is still together. Now we can plan for our reopening. We have assembled an internal Task Force composed of family members from each of our properties. The purpose of the plan is to establish what we will do to take care of our Family when we open and operate our properties so that our guests, employees, and our community stay as safe as possible. Each operating department has its own customized set of procedures, even more detailed than the summary presented here. We look forward to seeing everyone back on property soon, and we will do everything in our power to continue our commitment to make sure you, our customers and our communities are protected and safe.

1 Employee & Guest Health

The health and safety of our employees and guests is our number one priority.

Temperature & Wellness Check Points. Points of entry will be limited to allow our team to conduct non-invasive temperature and wellness checks utilizing no touch thermometers. Employees, guests, members or vendors confirmed to have a temperature over 100.4°F will not be allowed entry to the property and will be directed towards appropriate medical care.

Physical Distancing. Guests will be advised to practice physical distancing by standing at least six feet away from other groups of people not traveling with them while standing in lines or moving around the property. Physical layouts will be arranged to ensure appropriate distancing. Employees will be reminded to practice physical distancing by standing at least six feet away from guests and other employees whenever possible. All resort outlets will comply with, or exceed, local or state mandated occupancy limits.

Hand Sanitizer. Hand sanitizer dispensers, touchless whenever possible, will be placed at key guest and employee entrances and contact areas.

Front of the House Signage. There will be health and hygiene reminders throughout the property including the proper way to wear mask.

Back of the House Signage. Signage will be posted throughout the property reminding employees of the proper way to wear, handle and wash masks, use gloves (in positions deemed appropriate by medical experts), wash hands, sneeze and to avoid touching their faces.

Employee & Guest Health Concerns. Our employees have been given clear instructions on how to respond swiftly and report all presumed cases of COVID-19 on property. We will be ready to provide support to our guests. Employees are instructed to stay home if they do not feel well and are instructed to contact a manager if they notice a coworker or guest with a cough, shortness of breath, or other known symptoms of COVID-19. Employees and guests who are exhibiting any of the symptoms of COVID-19 while at the property are instructed to immediately notify their manager (employees) or hotel front desk (guests).

Case Notification. If we are alerted to a presumptive case of COVID-19 at the property, we will work with the state government agencies to follow the appropriate recommended actions.

2 Employee's Responsibilities

Mirbeau Employees are vital for an effective sanitation and health program.

Hand Washing. Correct hygiene and frequent handwashing with soap is vital to help combat the spread of virus. All Mirbeau employees have been instructed to wash their hands, or use sanitizer when a sink is not available, every 60 minutes (for 20-seconds) and after any of the following activities: using the restroom, sneezing, touching the face, blowing the nose, cleaning, sweeping, mopping, eating, drinking, entering and leaving public areas, going on break and before or after starting a shift.

COVID-19 Training. All employees will receive training on COVID-19 safety and sanitation protocols with more comprehensive training for our teams with frequent guest contact including Housekeeping, Food & Beverage, Spa and Fitness.

Personal Protective Equipment (PPE). Appropriate PPE will be worn by all employees based on their role and responsibilities and in adherence to state or local regulations and guidance. Training on how to properly use and dispose of all PPE will be mandatory. Every employee entering the resort will be provided a mask and required to wear that mask while on property. Gloves will be provided to employees whose responsibilities require them as determined by medical experts including housekeeping and public area attendants in direct contact with guests.

Timekeeping. Employees will be asked to clock in and out from our payroll provider app on their mobile devices eliminating the need for them to use a shared punch timeclock.

3 The Guest Journey

Guest Arrival

All guests will enter through designated checkpoints. A Mirbeau Screener will greet each visitor to the property. Visitors will be screened and asked to use hand sanitizer and to wear a mask (which will be provided by Mirbeau). Appropriate signage will also be prominently displayed outlining proper mask usage and current physical distancing practices in use throughout the resort.

4 Cleaning Products and Protocols

Our hotels and spas use cleaning products and protocols which meet EPA guidelines and are approved for use and effective against viruses, bacteria and other airborne and bloodborne pathogens. We are working with our vendors, distribution partners and suppliers to ensure an uninterrupted supply of these cleaning supplies and the necessary PPE.

Public Spaces and Communal Areas. The frequency of cleaning and sanitizing has been increased in all public spaces with an emphasis on frequent contact surfaces including, but not limited to, front desk and spa check-in counters, elevators and elevator buttons, door handles, public bathrooms, room keys and locks, stair handrails, gym equipment, dining surfaces and seating areas, Spa surfaces and seating areas, spa locker rooms with public showers, steam rooms and saunas.

Guest Rooms. Industry leading cleaning and sanitizing protocols are used to clean guest rooms, with particular attention paid to high-touch items including television remote controls, toilet seats and handles, door and furniture handles, water faucet handles, nightstands, telephones, in-room control panels, light switches, temperature control panels, alarm clocks, luggage racks and flooring.

Laundry. All bed linen and laundry will be changed daily and continue to be washed at a high temperature and in accordance with CDC guidelines to kill all virus and bacteria. Dirty linen will be bagged in the guest room to eliminate excess contact while being transported to the laundry facility.

Back of the House. The frequency of cleaning and sanitizing will also increase in high traffic back of house areas with an emphasis on the employee break rooms, employee entrances, employee restrooms, offices, kitchens, security scanning podiums, Employee Relations service desks and training classrooms.

Shared Equipment. Shared tools and equipment will be sanitized before, during and after each shift or anytime the equipment is transferred to a new employee. This includes phones, radios, computers and other communication devices, payment terminals, kitchen implements, engineering tools, safety buttons, cleaning equipment, keys, time clocks and all other direct contact items used throughout the resort.

Room Recovery Protocol. In the event of presumptive case of COVID-19 the guest's room will be removed from service and quarantined. The guest room will not be returned to service until case has been confirmed or cleared. In the event of a positive case, the room will only be returned to service after undergoing an enhanced sanitization protocol by a licensed third-party expert and approval by the state health department.

Air Filter and HVAC Cleaning. The frequency of air filter replacement and HVAC system cleaning has been increased and fresh air exchange will be maximized.

5 Physical Distancing

Throughout the property we will meet or exceed state and local health authority guidelines on proper physical distancing.

Queuing. Any area where guests or employees' queue will be clearly marked for appropriate physical distancing. This includes check-in, check-out, elevator, lobbies, retail shop, locker rooms, resting areas, and all dining areas.

Hotel Front Desk, Reservations Call Center. Agents will utilize every other workstation to ensure separation between employees whenever possible.

Restaurants and Bars. Restaurants and bars will reduce seating capacities to allow for a minimum of six feet between each seated group/party of guests.

Meeting Spaces. Meeting and banquet set-up arrangements will allow for physical distancing between guests in all meetings and events based on CDC and state recommendations. Self-serve buffet style food service will be suspended and replaced by alternative service styles.

Spa & Fitness Areas. Spa will have reduced capacities and limit amount of time each guest can spend in the facility. Lockers will be assigned to allow for a minimum of six feet between guests. Spa will also initiate contactless methods of scheduling and payment and remove any non-essential item throughout the facility to reduce guest touch points. Fitness areas will have physical distancing guidelines with occupancy limits in gym and classes.

Retail Spaces. Guest occupancy limits will be enforced to allow for appropriate distancing at our owned and leased retail spaces. Testers will be removed from all display cases.

Aqua Terrace. Aqua Terrace seating will be configured to allow for at least six feet of separation between groups of guests. Signs with strict occupancy guidelines for hot tub will be placed for guests to read.

Back of the House. Physical distancing protocols will be used in the employee break rooms, conference rooms, shared office spaces, and other high-density areas in order to ensure appropriate distancing between employees.

DEPARTMENT SPECIFIC POLICIES

Additional department and protocols are under review and will be added/modified as developed

SPA, RETAIL & FITNESS CENTER

1. Communal Areas

Pending guidance from local authorities and medical experts.

Cleaning & Sanitizing Protocol

- a) Clean and disinfect high touch areas including, door handles, light switches, phones, counters, furniture, screens, keyboards, radios, lockers, countertop amenities, sinks, faucet and handles, shower knobs, toilet paper dispensers, toilet handles, toilet seats, vanities, benches, etc.
